

KunduDas

- **Summary of the report.**

The report used PCA combined with parallel analysis on MNIST dataset for dimension reduction and feed the results to FNN to perform classification task.

- **Describe the strengths of the report.**

The poster is clearly-organized and uses proper figures for illustration.

- **Describe the weaknesses of the report.**

Personally, I think the introduction of the background knowledge is too detailed especially for these we have been familiar with in class. As a comparison the analysis on why to choose FNN or why that performance improvement of FNN-PCA happened may be too few.

- **Evaluation on Clarity and quality of writing (1-5): 4**

- **Evaluation on Technical Quality (1-5): 4**

- **Overall rating: 4**

- **Confidence on your assessment (1-3): 3**
