

ChenWu

- **Summary of the report.**

The report did clustering analysis on NIPS dataset using PCA, MDS, ISOMAP, LLE and LE.

- **Describe the strengths of the report.**

Set up the “motivation” and “problem” part to illustrate report’s logic and the interpretations about the results are detailed.

- **Describe the weaknesses of the report.**

The report is not organized in a common way including “abstract”, “introduction”, “conclusion” but instead, for example, puts the two experiments (Euclidean space and Manifold learning) together and can be distracting.

- **Evaluation on Clarity and quality of writing (1-5): 4**

- **Evaluation on Technical Quality (1-5): 4**

- **Overall rating: 4**

- **Confidence on your assessment (1-3): 3**
